

TRUX OFFROAD FOR THE NEW ACTROS

Trux Offroad mounted on the new Mercedes Actros, cab model Stream Space.

Trux has produced another front protection in aluminium for the new Mercedes Actros – this time for trucks that require high ground clearance.

Before the summer Trux presented its latest aluminium accessories for the new Mercedes Actros, Trux Highway, and now the next product is ready for delivery - Trux Offroad.

Trux Offroad is a front protection in aluminium designed with a high ground clearance and making it advantageous to mount on Trucks for forest and construction site transportations. Just like other products from Trux, the Trux Offroad is produced in the aerodynamic shape Airflow which minimizes air resistance.

At first glance, the front protection is quite similar to a Highway, but the smaller Offroad has at least as many advantages as the bigger front protection.

– Offroad is ideal for timber, gravel and concrete transport etc., which require high ground clearance, but still wants the same level of protection as Highway in front of the truck, says Hasse Olsson, manager at Trux in Ljusdal.

Trux will showcase a selection of its products, including some of the equipment to the new Mercedes Actros at the Elmia Lastbil 2012 fair the 22–25 August in Jönköping, Sweden, in their stand U:564.

Trux is the market leader in Europe of front-mounted safety and styling equipment for trucks. The company was founded in 1986 and the largest individual markets are Sweden, Norway and Germany.

Trux AB is located in Ljusdal in the middle of Sweden and is a part of Mekanotjänst Holding AB which has 276 employees and a turnover of SEK 470 million
