

TRUX ACCESSORIES FOR THE NEW VOLVO FH

Trux products for the new Volvo FH includes the front protection Highway and the Top Bar.

Just in time for the launch of the new Volvo FH, Trux presents their range of design patented aluminium accessories, such as front protection and light bars, to this new truck.

The unveiling of the new Volvo FH on the 5th of September came with a bang. At Trux AB in Sweden, which produces light bars and front protectors of aluminium for heavy trucks, a great interest has been noticed by the many requests for Trux Accessories to the new model.

The designers at Trux have worked extensively since the launch and as usual there has been a careful development of the accessory design so that it follows the shape of the vehicle. Trux has also chosen to patent the design of its unique front protection.

As with Trux other products, these are also produced in aluminium for minimal weight but without compromising on safety. The front protection Highway protects the truck's sensitive parts in a collision and eases the costly consequences.

– Volvo is one of the truck brands we sell most of our accessories too and Highway is our most popular front protection – so naturally we want to be involved and make Volvo's future even safer, says Hasse Olsson, Manager at Trux in Ljusdal.

The retailing of Trux aluminium accessories for the new Volvo FH is immediate.

Trux is the market leader in Europe of front-mounted safety and styling equipment for trucks. The company was founded in 1986 and the largest individual markets are Sweden, Norway and Germany. Trux AB is located in Ljusdal in the middle of Sweden and is a part of Mekanotjänst Holding AB which has 276 employees and a turnover of SEK 470 million.
