

COMPLETE RANGE OF TRUX FOR VOLVO

At www.trux.eu you can customize your own Volvo truck with all the products from Trux.

During this year at Volvo Truck's tour around Sweden, Trux has displayed a complete line-up of aluminum accessories for Volvo's new vehicle fleet.

In the last year Volvo have renewed their entire vehicle fleet. The FH, FMX, FM, FE and FL have all been redesigned and Trux has followed in their footsteps. At first, Trux developed aluminum accessories for the newly launched FH4 series and have now completed a new range of front protectors and light bars for the new FE and FL models.

On the Trux website there is a configurator, called "Create Your Own Trux", where customers can try out how their truck would look with Trux front protection and lights bars. The configurator includes all new Volvo models with assembly instructions, pictures and other information on each Trux product.

Although Trux recently has been focusing on the new trucks from Volvo they will continue to produce accessories for the earlier models and will do so as long as demand exists.

– Regardless of which Volvo model the customer chooses, he or she will always have a wide range of various lightweight aluminum accessories from us to choose from, says Hasse Olsson, manager at Trux Ljusdal.

Trux is the market leader in Europe of front-mounted safety and styling equipment for trucks. The company was founded in 1986. Its largest markets are Sweden, Norway, Denmark, Finland and Germany.

Trux AB is located in Ljusdal in the middle of Sweden and is a part of Mekanotjänst Holding AB which has a turnover of SEK 400 million.
